

1. Function:

This conductive cloth strap helps protect static-susceptible electronics from damage by shunting hazardous static buildup to ground. Peel the adhesive back off the copper tape to connect to ground, and then wrap the black lead around your wrist.

2. Applications:

The disposable wrist strap is ideal for plant visitors and short term workers. Because of its low unit cost, it can also be shipped with loaded PC boards and other sensitive materials to provide the means for the field service technician to take appropriate ESD precautions.

3. Specifications:

- Band Length: 5 feet
- Band Width: 1"
- Material: Non-woven fabric
- Conductors: 1
